Our satellite solutions being provided by this division had been awarded with the customer's satisfaction for the brilliance and dependability of its services. Net Sat, being containing the core competence of NETSAT expertise and largest infrastructure contributes its major role in company's achievement from the time of its inception in Karachi Pakistan and has been very prominent in delivering complex projects with a distinct ease and excellence.

VOICE. VIDEO. DATA.

THE AWARD-WINNING
END-TO-END FOUNDATION

NET IP

The award-winning technology products and expertise provide our clients with most powerful and intelligent technology solutions to support convergent voice, video and data through a solid end-to-end foundation. We make the deployment of essential information sharing network a seamless and secure reality so that you never miss a step in the designing and implementation of e-business applications. We have expertise to design integrate, operate and maintain all sorts of LAN/WAN solutions with the provision of ICT & enterprise infrastructure.

WIRELESS CONNECTIVITY.

LAST-MILE DELIVERY FOR HIGH
SPEED INTERNET & FRAME
RELAY CONNECTIVITY

NET WAVE

Net Wave being the RF Services vertical of NETSAT, can cater customer's requirements for Point to Point (P2P) & Point to Multipoint connectivity in respect to Metropolitan (MAN) solutions as well as last-mile delivery for high-speed Internet and Frame Relay Connectivity.

The wireless devices operate within the frequency range of ISM-Band (2.4 GHz) and C-Band (5.8 GHz), as per the directives of Pakistan Telecommunication Authority (PTA). The proposed solution by Net Wave is based on 5.8 GHz Radio Frequency Wireless Data Technology in all the node cities.

MAKING ACCESSIBLE.

UNPARALLELED
COMMUNICATION &
COLLABORATION SERVICES

NET VAS

The Value Added Service vertical of NETSAT – Net VAS the most innovative VAS into Pakistan. Net VAS can provide the following services:

- Messaging & Collaboration
- Email Solutions
- Unified Messaging
- Knowledge Management Solutions
- Video Conferencing Solutions
- System Integration Solutions

MOBILE BROADBAND.

VOICE, VIDEO & DATA
TRANSMISSION THROUGH
ACCELERATED SOLUTIONS

NET GSM

Development of broadband data is growing rapidly across the world. In areas lacking fixed broadband infrastructure, mobile networks are expected to play a major role as it has been the case in rural areas here Second Generation (2G) GSM has been the predominant way to provide voice and text services. Satellite can be used for mobile backhaul when the distance between the base station equipment and the core of the network is too large for microwave to be economically viable.

MEDIA SOLUTIONS.

DESIGN, DEPLOY & MAINTAIN
MEDIA BROADCASTING
INFRASTRUCTURE.

NET MEDIA
